

The information in the following table summarizes the minimum client configurations recommended for use with Workforce HR and Workforce Payroll. Also note that higher version operating system requirements may supersede selected minimum requirements below like processor speed and memory.

Processor	Recommended: 2.0 GHz or better Intel Pentium 4 or AMD equivalent.
Memory	Minimum Supported: 2 GB Recommended: 4GB
Hard Disk Space	Minimum free disk space: 100MB
Display Resolution/Graphical Memory	Minimum: 1024 X 768 Minimum graphics memory: 128MB (Flash Player hardware requirement)

Internet Explorer setup for anyone accessing the HR/Payroll Setup pages:

- User must be setup as a local administrator of the workstation.
- If the OS is Windows 7, 2008 or Vista you must right click on the IE icon and "Run as Administrator" or setup a shortcut to the site with the "Run as Administrator" condition.
- Temporary Internet files must be set to "Every time I visit the webpage" to make sure you are getting the latest downloads.
- The website address for the Kronos system must be in Trusted Sites or possibly Local intranet sites depending on security settings.
- Enabled Protected Mode should be unchecked.
